

Nematology Department Seminar (NEM 290)
Winter Quarter '02
Mondays, 4:10 - 5.00 p.m.
1344 Storer Hall

Instructor in charge: Bruce A. Jaffee (bajaffee@ucdavis.edu)

- January 7** Steve Nadler, Professor, Nematology, UC Davis
Using molecular data to delimit nematode species: An example from
pinniped hookworms
- January 14** Noelle L'Etoile, Assistant Professor, Center for Neuroscience, UC Davis
Olfactory Adaptation and Discrimination in *C. elegans*
- January 21** **HOLIDAY** – No Seminar
- January 28** Lien Luong, Graduate Student, Nematology/Entomology, UC Davis
Venereal Worms: Dauer Transmission Dynamics
- February 4** Howard Ferris, Professor, Nematology, UC Davis
Nematode Roles in the Soil Food Web
- February 11** Jack Qiu, Postgraduate Researcher, Nematology, UC Davis
Identification of plant-parasitic nematodes from soil extracts with PCR
- February 18** **HOLIDAY** – No Seminar
- February 25** Mario Tenuta, Postdoc., Nematology, UC Davis
Adenophoreans in a Coal Mine: Nematodes as Biological Indicators of
Environmental Stress and Unsustainable Management Practices
- March 4** Carl Chen, Postdoc., Nematology UC Davis
C. elegans: Be a mother and die
- March 11** Inga Zasada, Graduate Student, Nematology, UC Davis
Title to be Announced
